

FIT5046 Android Application Design Proposal and Skeleton Prototype (20%) - 2026 S1 Marking Guide and Rubric

Criteria	Marks	Excellent (HD) 80-100%	Good (D) 70-79%	Satisfactory (C) 60-69%	Needs Improvement (P) 50-59%	Unsatisfactory (N) 0-49%
Introduction 1.1 domain & SDG goals	/5	clear, well-summarised, meaningful, with well-justified reasoning, and meets the Assign Spec requirements. showing creativity, thoughtful consideration, and strong attention to detail	mostly clear and sufficient, complete Showing a moderate to low level of creativity, thoughtful consideration, & attention to detail	Some parts unclear or insufficient , with minimal justification Showing a very low level of creativity, thoughtful consideration, and attention to detail	Lacking clarity , or justification Some parts are missing Lacking creativity, thoughtful consideration, & attention to detail	Missing details, or poorly described with major gaps A lack of creativity, thoughtful consideration, and attention to detail
Introduction 1.2 impact and value	/5	clear, well-summarised, meaningful, with well-justified reasoning, and meets the Assign Spec requirements. showing creativity, thoughtful consideration, and strong attention to detail	mostly clear and sufficient, complete Showing a moderate to low level of creativity, thoughtful consideration, and attention to detail	Some parts unclear or insufficient , with minimal justification Showing a very low level of creativity, thoughtful consideration, and attention to detail	Lacking clarity , or well-justified reasoning Some parts are missing A lack of creativity, thoughtful consideration, and attention to detail	Missing details, or poorly described with major gaps A lack of creativity, thoughtful consideration, and attention to detail
Introduction 1.3 User Group	/5	clear, well-summarised, meaningful, with well-justified reasoning, and meets the Assign Spec requirements. showing creativity, thoughtful consideration, and strong attention to detail	mostly clear and sufficient, complete Showing a moderate to low level of creativity, thoughtful consideration, and attention to detail	Some parts unclear or insufficient , with minimal justification Showing a very low level of creativity, thoughtful consideration, and attention to detail	Lacking clarity , or well-justified reasoning Some parts are missing A lack of creativity, thoughtful consideration, and attention to detail	Missing details, or poorly described with major gaps A lack of creativity, thoughtful consideration, and attention to detail
Introduction 1.4 Context-awareness	/5	Clear description of the sensor data simulator Well-researched and selected public dataset Listing multiple contextual info (sensory and non-sensor data) that will be used Clear description of context-aware computing , e.g. personalisation of app features or adjusting settings by providing details showing creativity, thoughtful consideration, and strong attention to detail	Mostly clear and sufficient Mostly well selected dataset Minor issues with multiple context Context-aware computing is not described clearly or not useful to the app Showing a moderate to low level of creativity, thoughtful consideration, attention to detail	Issues and gaps with describing simulator, or the dataset selection, multiple context, or justification of context-aware computing Showing a very low level of creativity, thoughtful consideration, and attention to detail	Some parts are missing, or not meaning/useful or relevant A lack of creativity, thoughtful consideration & attention to detail	Missing details, or poorly described with major gaps A lack of creativity, thoughtful consideration, and attention to detail
2.1 Android components, 2.2 App functionalities,	/15 (3x5)	Each part includes basic requirements and additional features & components, and screens Additional parts are described clearly , and are thoughtful and realistic , and relevant to the app	Functionalities, components and screens are listed with minor issues , Mostly based on assignment requirements.	Functionalities, components and screens are listed but with some issues . Some parts are missing . Somewhat thoughtful and realistic	Functionalities, components or screens are unclear, incomplete, or do not meet the assignment requirements	Functionalities, components and/or screens are missing. Assignment requirements are not addressed.

Criteria	Marks	Excellent (HD) 80-100%	Good (D) 70-79%	Satisfactory (C) 60-69%	Needs Improvement (P) 50-59%	Unsatisfactory (N) 0-49%
and 2.3 Screens and User Interface		meets the assignment specification requirements	Mostly relevant, thoughtful and realistic			
3.1 UI Design & Android UI Skeleton Prototype: Diagrams and screenshots	/20	All screens are created in Compose The diagram includes all the screens with arrows , 4 screenshots per page are provided Excellent design with clear and logical navigation flow	All screens are created in Compose Minor issues with the diagram, arrows or 4 screenshots per page Navigation flow is mostly clear	All screens are created in Compose There are issues with the diagram, arrows or 4 screenshots per page Navigation flow (arrows) has issues	Screens created in Compose The diagram and screenshots are incomplete or contain incorrect elements Navigation flow (arrows) has major issues	Key parts are missing or incorrect, and the requirements for this criterion are not met
3.2 UI Design & Android Prototype: UI and UX	/20	Screens are well-designed & visually appealing UI components are well-aligned & consistent Attention to detail & thoughtful design	Screens are mostly well-designed and visually appealing, with minor issues in UI and UX UI components are mostly well-aligned & consistent Some attention to detail	Screens could be improved by better design, visuals, and UX some inconsistencies in UI elements Limited attention to detail	Screens lack visual appeal , and UX and usability require significant improvements UI components are used inconsistently Lacking attention to detail	Screens, visuals, UX and usability are poorly designed UI components are poorly selected or inconsistent
4. TWO Password and THREE Form design guidelines	/10 (5x2)	ALL five design guidelines are provided (based on the week 6 seminar) with clear information on where they were used	Minor gaps and missing or irrelevant information with the guidelines and/or their information	Some gaps and missing or incorrect information with the guidelines and their information	Guidelines and their information are mostly missing or not right	UI guidelines and their information are missing
5. TWO Advanced Features & online sources	/10 (2x5)	Two advanced features are clearly described & well-researched with six online sources Features are realistic and relevant to the app	Two features are described (mostly well-researched), with six sources Mostly feasible and relevant to the app	Two features are listed, but with incomplete or irrelevant sources . Not sufficiently relevant or feasible	Features or sources are incomplete . Not relevant and feasible	Features or sources are missing
6. Citations & References	/5	At least 6 high-quality online sources cited and included in the references, APA style	1-2 references missing , or minor errors in citation or referencing	Some references are missing or not high-quality , and mistakes with APA format	Few or irrelevant references , with significant formatting errors	No or few references. No attempt at APA style

Deductions from the total mark	Level	
Submission Format Mismatch (e.g., incorrect file type and/or incorrect file naming convention)	Group	-2-5% ; Failure to follow clear submission instructions, impacting marking efficiency.
Missing Required File(s) from the Original Submission	Group	-10% per missing/incorrect file as required ; The teaching team will follow up on any missing or incorrect file(s) to enable marking; however, failure to submit any required file in the original submission will result in a 10% mark deduction.
Late submission	Group	-5% per day as per Monash late submission policy.

Failure to Declare Use of Generative AI or Other Online Tools (Lack of required details will result in a 25–50% deduction ; complete lack of acknowledgement may result in a Zero mark)	Group	Can be as serious as receiving 0% for the Group Mark, which in this case is the entire assessment ; managed as an allegation of academic misconduct per University policy. The use of any Generative AI tools must be clearly documented and acknowledged at the end of the slides. All details, including prompts and any AI-generated content, must be provided. The acknowledgment should also include any templates, online presentation tools, or external assistance used. https://www.monash.edu/learnhg/build-digital-capabilities/create-online/acknowledging-the-use-of-generative-artificial-intelligence
---	--------------	--

Group mark: _____ / 100

Final Mark: _____ /100 (Total Mark – **deductions**)
